**World Cancer Day – 4<sup>th</sup> February 2015**

**World Cancer Day 2015**

*"We may never understand illnesses such as cancer. In fact, we may never cure it. But an ounce of prevention is worth more than a million pounds of cure."*

*- Dr. David B. Agus (Keck School of Medicine)*

Around the world, on this day, people and organizations have events and activities that help raise awareness on cancer and how to prevent, detect or treat it.

Cancer is a leading cause of death and a public health problem worldwide. WHO estimates that 84 million people will die of cancer between 2005 and 2015 without intervention; 12.5% of all deaths are caused by cancer, that's more than the percentage of deaths caused by HIV/AIDS, tuberculosis, and malaria put together.

Every year 160,000 children are diagnosed with cancer, and it is estimated that 90,000 will eventually die of cancer. The theme of World Cancer Day in 2015 is "Not beyond us", offers WHO an opportunity to demonstrate the Organization's policies and programmes for countries to reduce their cancer burden.

The Global action plan for the prevention and control of NCDs 2013-2020 offers the overall framework for country action. The Global action plan calls for national, international and multi-sectoral action across multiple areas to reduce cancer risks in populations, and to strengthen health care delivery systems for people with cancer. Environmental and infectious causes are important for cancer prevention so that WHO's guidance in those areas is part of the comprehensive approach.

**The 4 Goals of World Cancer Day:**

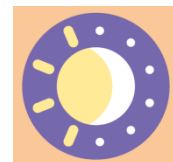

**Healthy Life Choices** - Empowering people to make healthy choices and reducing the social and environmental risk factors for cancer are keys to achieving the global goal of reducing premature deaths from non-communicable diseases (NCDs) by 25% by 2025 and reaching the targets of the World Cancer Declaration.

**Early Detection** - Ensuring the availability of and access to, early detection programmes for cancer can significantly reduce the cancer burden in all countries.

**Treatment for All** - All people have the right to access quality, effective cancer treatment and services on equal terms, regardless of geography and without suffering economic hardship as a consequence.

**Quality of Life** - Understanding and responding to the full impact of cancer on emotional, mental and physical wellbeing will maximize the quality of life for patients, their families and careers.

**Space for Activity or Initiative**
